Perform!**

## Operatory Cabinetry

For 30 years ILS Dental has the unique ability to customize any of our standard cabinets, or we will design the cabinets to fit your desired needs and requirements. We have designed cabinetry to utilize any particular equipment manufacturer's dental equipment and units. We can custom design 12 O'clocks, Center Islands, Side cabinetry, Base cabinets, Wall cabinets, as well as Alabama, North Carolina and Doctor mobiles.

## Sterilization Cabinetry

Whatever your needs or requirements, ILS has a varied selection of standard sterilization center's or offers the option to custom design one to fit your space requirements while enhancing the processing of instrument flow in your dental practice. Functioning properly, it allows dental practitioner's to create an environment that minimizes cross-contamination and ensures the safety of patients and staff. Designed properly, it keeps the office running smoothly and on schedule.

## Oral Surgery Cabinetry

ILS has been designing innovative cabinet solutions for the oral surgery offices throughout the United States. Our reputation has been built around our unique ability to meet every cabinetry need in the oral surgery office. Some times that can be achieved with standard modular cabinetry....but often; the practice is better suited when we "tailor" our standard units to meet functional and aesthetics requirements of the practice.
